Amendments to the Claims:

Please amend claim 1 as follows. The following listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

Claim 1 (Currently Amended). A document reading device comprising:

a reading unit for reading an image of a document;

a document size detector for detecting a size of the
5   document; and

a controller for controlling said reading unit to read the image of the document in a read size corresponding to the document size confirmed from a detection result of said document size detector;

10   wherein said controller includes a user interface for inputting and outputting various information, and read size specifying means for requesting designation of a document size via said user interface when the document size is not confirmable from a detection result of the document size detector and

-2-

15   specifying the read size corresponding to the document size which

is designated via said user interface according to the request,

wherein said reading unit includes a document table for

supporting a single document placed thereon and a cover capable

of being opened and closed, and said read size specifying means

20   is constructed such that the document size designated via said

user interface is confirmed in a state where said cover is

closed, and the document size is maintained until said cover is

opened,

wherein the document reading device further comprises a

25   document feeder for feeding a document other than the document on

said document table,

wherein said reading unit is capable of reading an image of

the other document fed by the document feeder while maintaining

the document on the document table, and

30   wherein said read size specifying means ~~includes a memory~~

~~and~~ is configured such that the read size for the document fed by

said document feeder is independently specified from the read

size for the document on said document table ~~by maintaining~~ <u>to</u>

<u>maintain</u> the document size designated <u>via said user interface</u> for

35   the document on the document table <u>when said reading unit is</u>

<u>reading the image of the other document fed by the document</u>

ı

-3-

Appln. No. 09/847,843
Amendment dated September 12, 2005
Reply to Office Action of June 14, 2005

<u>feeder while maintaining the document on the document table</u> ~~in~~

~~the memory until the cover is opened~~.

40   Claim 2 (Cancelled).

          Claim 3 (Cancelled).

                                        -4-
